

## Komet Dental unveils ETNA: The Ultimate Solution for Premium Ceramic Restorations.

### Lemgo, January 16, 2025 - Precision, high-quality grinders and polishers for flawless ceramic results.

Komet, a renowned leader in dental instrumentation, is proud to introduce the ETNA system - an innovative line of premium grinders and matching polishers designed specifically for the processing of all-ceramic restorations. With over 100 years of expertise, Komet continues to set the standard for precision and durability in the dental industry, and the ETNA range is no exception.

### Elevate Every Restoration with ETNA

Monolithic restorations have become the standard in prosthetic dentistry, where the appearance and functionality of ceramic restorations depend on meticulous craftsmanship. This sophisticated product line combines advanced technology with exceptional craftsmanship to meet the exacting demands of modern dental laboratories.

The ETNA system is meticulously engineered to provide unparalleled efficiency. It consists of high-performance grinders and perfectly matched polishers, tailored to ensure outstanding results in ceramic restorations. Whether refining delicate details or achieving a flawless finish, these instruments are designed to consistently deliver outstanding results with every use.

### Crafted for Complete Ceramic Excellence

One of the defining features of the ETNA system is its superior durability. Each component is built to withstand the rigorous demands of daily professional use, offering a significantly extended service life compared to conventional instruments. This longevity not only enhances cost-effectiveness but also reinforces Komet's commitment to delivering value without compromise.

In addition to durability, the ETNA system sets a new standard for performance. The grinders are crafted to enable precise, efficient material removal, allowing technicians to shape ceramic restorations with accuracy and confidence, whereas the polishers complete the process by delivering a smooth, high-gloss finish in just two simple steps. The special diamond grit, designed for a soft, flexible application, ensures that each restoration has a flawless, professional surface quality.

# Press Release

Flexibility is another hallmark of the ETNA system. Its versatile design caters to a wide range of ceramic materials, making it an indispensable tool for dental laboratories and clinicians alike. This adaptability underscores Komet's holistic approach to ceramic treatments, ensuring that professionals have the tools they need to achieve exceptional outcomes every time.

## ETNA by Komet: Premium Tools for Perfectionists.

By introducing the ETNA system, Komet reaffirms its position as a leader in dental innovation. This product line is not merely an addition to our portfolio; it is a testament to our dedication to empowering dental professionals with tools that combine precision, reliability, and performance. With ETNA, we invite you to elevate your practice and redefine what is possible in ceramic restorations.

**About Komet Dental**

Gebr. Brasseler GmbH & Co KG with its headquarters in Lemgo has been distributing one of the world's largest ranges comprising around 25,000 rotary dental instruments and systems under the Komet Dental brand since 1923. These are available through sales companies and partners in around 100 countries worldwide.

The comprehensive range includes sophisticated standard instruments and innovative solutions that set industry-wide standards in dental practices and laboratories. In addition to the traditional "round bur", the broad portfolio includes many other instruments such as crown cutters, composite removers and polishers. This is complemented by products and systems for endodontic treatments. Services such as the Komet Academy with training courses on the use of the products round off the range.
