## Product Finder | Laboratory

Product recommendations for the dental laboratory.

Work on all-ceramics →

← Work on plaster

← Work on acrylics

← Work on metal

The Komet tool navigator.  
 The fastest way from material to tool.

At Komet, we know the daily routine at the dental lab like hardly anyone else does. That's why we think just like the technician at a dental lab: from one tool to the next. Plaster, acrylics, metal and ceramics. We have the perfect solution for each material and each application in our range.

We compiled this handy little guide so that you can get on with your work at the lab without much searching. It will always show you the direct route to a perfect result.

This medium highlights a selection of laboratory instruments. The complete Komet range of laboratory instruments is much larger. For further information, visit [kometdental.com](http://kometdental.com), directly contact your sales representative or send a message to [export@kometdental.de](mailto:export@kometdental.de).
